DIAMOND DRILL FOR HARD VITRIFIED & PORCELAIN TILES

WILL OUT PERFORM ANY OTHER TOOL

Used on hard vitrified and porcelain tiles and other extremely hard surfaces.

WILL OUTLAST ANY OTHER DRILL IN ITS CLASS

If used at the correct speed and modestly water cooled.

SUITABLE ALSO FOR DRILLING

Granite, Sandstone, Marble, Glass, Stone, Fibreglass, Hard Plastics, Graphite, Carbon etc.

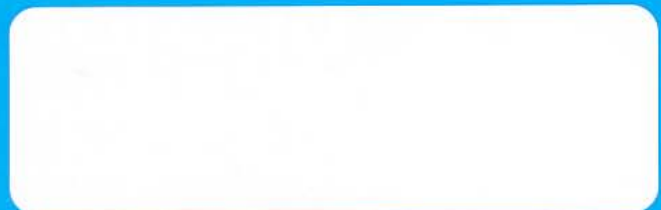

MANUFACTURED BY

Electro-Bonded method, using the latest U.S. diamond technology.

IMPORTANT INSTRUCTIONS - SEE OTHER SIDE

MADE IN AUSTRALIA

DISTRIBUTED BY:

DIAMOND DRILL FOR HARD VITRIFIED & PORCELAIN TILES

PLEASE READ CAREFULLY

- Ensure firstly that hand held drilling equipment rests on firm support.
- Place template (piece of wood or masonite) with appropriately sized hole on tile surface to serve as a guide for initial entry.
- Once initial entry has been achieved, remove template and continue drilling with moderate pressure.
- ***Moderate amount of water coolant is absolutely essential.*** Spray pump bottle with tap water will suffice.
- Regularly withdrawing the drill allows debris to be washed away.
- Do not overheat the drill.
- Never use hammer action.
- ***Do not rush. Use only moderate pressure.***

RANGE OF RECOMMENDED SPEEDS

6/mm DIA	from 2400/RPM	to 2800/RPM
8/mm DIA	1800/RPM	2000/RPM
10/mm DIA	1400/RPM	1600/RPM
12/mm DIA	1200/RPM	1400/RPM
20/mm DIA	900/RPM	1200/RPM
22/mm DIA	900/RPM	1200/RPM
25/mm DIA	900/RPM	1200/RPM
32/mm DIA	650/RPM	800/RPM
35/mm DIA	650/RPM	800/RPM
38/mm DIA	650/RPM	800/RPM

Make sure that the correct speed is used. Wrong speed will overheat the drill.

- Remove all debris from inside and outside of the drill before drilling new hole.

ALWAYS REMEMBER - HEAT DESTROYS DIAMOND DRILLS
