DIAMOND T-BAR DRESSER

INDISPENSABLE TOOL FOR EACH BENCH GRINDER

LONG LASTING - EASY TO USE

- Will dress all types of standard grinding wheel, up to 200mm (8") diameter (Aluminium Oxide or Silicon Carbide wheels)
- Body is made from solid steel with 115mm (4¹/₂" knurled handle
- Diamond-coated cutting surface is 42 x 10mm
- Super-abrasive coating consists of blocky diamonds, set in hard nickel bond
- Diamond size: D427 (40-50 U.S. mesh) ● Total weight: 179 grams
- How to use it (See *Technical Information below*).

THIS HANDY TOOL WILL MUCH IMPROVE YOUR WORKSHOP

- It removes the accumulated debris from surface of grinding wheel.
- It crushes the blunt (glazed) surface, and exposes fresh layer of abrasives, thus instantly improving the performance of the wheel.
- It shaves the grinding surface to required form.

TECHNICAL INFORMATION When dressing grinding wheel

- * Do not use coolants - dry run is sufficient.
- * Always wear protective glasses.
- * Ensure that grinding wheel is encased in safety shield.
- * Never attempt to dress wheel without rigid rest-plate.
- * Rest plate must be firmly fixed as close to grinding wheel as possible (ideal distance 3mm).
- * Do not use excessive force.
- * When dressing the wheel, always move T-Bar Dresser sideways - never up and down.
- * Always observe the safety procedures applicable to your particular bench grinder.

* SPECIAL SHAPES OF T-BAR DRESSERS AVAILABLE ON REQUEST. PLEASE CONTACT YOUR LOCAL DEALER.
